Arizona Corporation Commission Docket Control 1200 West Washington Street Phoenix, Arizona 85007

Re: Virgin Mountain Utilities Company; Docket No.; Docket No W-03551A-04-0325; CC&N Extension Application; Decision No. 68449, dated February 2, 2006; Compliance Filing

Dear Sir:

The subject Decision requires, among other things, the Company to file an Approval of Construction for the expansion facilities. Enclosed herewith please find 15 copies of a Certificate of Approval to Construct as required. This completes all requirements under the Decision. The Company has filed under separate cover a formal Motion requesting the issuance of the CC&N.

In the event you have any questions regarding this matter, please do not hesitate to contact the undersigned.

Sincerely,

Richard L. Sallquist

Arizona Department of Environmental Quality

Water Quality Dosign Paving

Water Quality Design Review Unit Northern Regional Office Date Approved

mmo 8.

General Provisions

- 1. Notice shall be given to the Northern Regional Office (NRO) in Flagstaff (1 (877) 602-3675) and to the appropriate county department when construction of the project begins to allow for inspection during construction per A.R.S § 49-104(B)(10). Contact Andy Wilson at (928) 773-2708 at least seven days prior to the start of construction.
- 2. The project owner shall contact a professional engineer as soon as possible to provide detailed construction inspection of this project (A.A.C. R18-5-507). Upon completion of construction the retained professional engineer shall send to NRO the following:
 - a. Engineers Certificate of Completions (attached).
 - b. Sealed and signed As-Built plans with construction specifications.
 - c. All Construction test data cartified by the engineer.
 - d. All construction test data; the certified number of an operator, who is certified by the Department at a grade appropriate for the facility, is employed to operate the potable water distribution system. After receipt of the items outlined above, NRO will review the file and, if in order, will issue an Approval of Construction (AOC).
- 3. Operation of a newly constructed facility shall not begin until an AOC is issued by the Department per A.A.C. R 185-507(A).
- 4. A minimum pressure of 20 pai shall be provided at all points in the distribution lines at all times.
- 5. All materials and products that come into contact with drinking water or drinking water treatment chemicals must comply with NSF Standard 61. Any "or equal" substation shall also meet NSF Standard 61 may be considered if they otherwise comply with A.R.S. § 49-353.01.
- 6. Backflow prevention shall be provided in accordance with A.A.C. R 18-4-115 and / or local ordinances.
- 7. The open end of each air relief pipe from automatic valves shall extend at least one foot above grade and shall incorporate pipe elbows to cause the opening, permanently covered with #16 mesh screen, to face downward.
- The certificate voids and supersedes all previous "Approval to Construct" issued previously for this file number.
- 9. Water line sewer line separation shall meet A.A.C. R 18-5-502. The separation requirements of A.A.C. R 18-5-502 shall extend to all water line services and sewer line services within the right-of-way. Separation of water and sewer line on an individual private property shall meet the requirements of the Uniform Plumbing Code (UPC)
- 10. This Approval to Construct will become void if an extension of time is not granted by the Department within 90 days after passage of one of the following (A.A.C. R18-5-505(E)):
 - a. Construction does not begin within one year after the date the Approval to Construct is issued, or
 - b. There is a halt in construction of more than one year, or
 - c. Construction is not completed within three years after the date construction begins.
- 11. Construction material used in public water systems, including residential and non-residential facilities connected to the public water system, shall be lead free as defined by A.A.C. R 18-4-101(46)

Special Provisions

- 1. The water distribution system must be tested for conformance to A.A.C. R18-5-502 before the Approval of Construction is issued. A Fire flow test per the appropriate ASTM standard shall be conducted on at least one fire hydrant in the lowest pressure zone. The stable residual pressure and hydrant flow must be recorded and certified by the Project Engineer. This data, certified by a Professional Engineer registered in Arizona, shall be used to calibrate the water model provided with the Application for Approval to Construct (ATC). The resultant fire flow analysis using the new calibration shall be provided with the ECOC for the application for Approval of Construction (AOC). The resultant model must demonstrate that the predicted minimum system pressure during a fire flow plus maximum daily flow event is 20 psi or greater.
- 2. All existing private wells shall be either physically disconnected or abandoned according to ADWR requirements from the Virgin Mountain Utilities Company water system. If the private well is connected remains connected to the residence, a Reverse Pressure Pfincipal (RVP) backflow preventer shall be installed and maintained by a licensed backflow prevention contractor to assure that the public water system is protected from backflow events.

End of Provisions
